

HELPING COMPANIES IMPLEMENT INDUSTRY 4.0

Extremity3D has multiple options to affix sensors and hardware to tools and equipment needed for data collection and asset tracking

Solutions made with lightweight, non-marring, asset protecting, durable materials

Great solution for legacy tools. Our process customizes the solution to the tool

Improves production efficiency

Protects sensors from damage; protects assembly tools; protects product in production

Nexonar motion tracking technology

ProGlove barcode technology

Zebra RFID technology

Ubisense precision location technology
